**2022 Impact Factors Released: Intensive Care Medicine  
Achieves Remarkable Results**

We are delighted to share with you the remarkable results of Intensive Care Medicine (ICM) for the year 2022 Impact Factor. With great pleasure, we announce that ICM has achieved an outstanding **Impact Factor of 38.9!**

Once again, ICM solidifies its position as one of the most influential Journals in the Critical Care category, as indicated also by the highest Cite Score in the category, claiming the top spot among journals solely dedicated to critical care topics.

This remarkable accomplishment serves as a testament to the journal's unwavering commitment to disseminating cutting-edge research and driving progress in the field of intensive care medicine. It is a testament to the exceptional collaboration of our authors, reviewers, editors, the **European Society of Intensive Care Medicine (ESICM)**, and our publisher. We owe this success to each and every one of you.

**Intensive Care Medicine is truly YOUR journal**, and we recognize that this achievement would not have been possible without your valuable contributions. Every submission, comment, download, citation, and social media share has played an instrumental role in bringing us to this momentous point.

Once again, we extend our heartfelt gratitude to each of you for your invaluable contributions. Together, we have achieved this remarkable milestone, and we eagerly anticipate the exciting journey ahead.

Warm regards,  
Giuseppe Citerio
