

Nanomedicine 2019

2-3 May 2019

NanoMib
NANOMEDICINE CENTER
MILANO BICOCCA

University of Milano-Bicocca
Milano, Piazza della Scienza 1-4
Building U4 Room 08

Thursday 2 May 2019

11.10-11.15 Opening

Cristina Messa (Rector), Massimo Masserini (Director of NanoMIB),
Francesco Nicotra (Workshop chair)

11.15-11.45 Round table **“Nanomedicine beyond H2020,
International, National and Regional perspectives”**

Moderator Francesco Nicotra

Donata Medaglini (Italian representative in H2020 Committee), Furio
Gramatica (ETPN), Serena Borgna (APRE), Ermanno Boccalari (Ricerca
e Innovazione, Regione Lombardia)

Nanotechnology for targeted therapies

Chair Massimo Masserini

11.45 Keynote, Gert Storm, Utrecht University, “Targeted
nanopharmaceuticals: where do they stand?”

12.15 Giovanni Tosi, University of Modena e Reggio Emilia, “Brain
Disorders and Tailored Nanomedicines: how to move forward”

12.30 Francesca Re, School of Medicine and Surgery, University of
Milano-Bicocca “Nanomedicine-based therapy for Alzheimer’s
disease”

12.45 Federica Meloni, IRCCS Policlinico San Matteo Foundation, “New
local and targeted therapeutic approaches in pulmonary fibrosis and
bronchiolitis based on nanotechnology”

13.00-14.00 Lunch and Poster session

Nanomedicine and Theranostics

Chairs Paolo Caliceti and Davide Prosperi

14.00 Miriam Colombo, University of Milano-Bicocca, “Colloidal
nanoparticles: master key for biomedical theranostics”

14.15 Daniela Montesarchio, University of Napoli Federico II “Design,
synthesis and characterization of multifunctional nanosystems for
theranostics”

14.30 Paolo Zunino, Politecnico di Milano, “Mathematical modeling
and simulations in nanomedicine”

14.45 Francesca Mastrotto, University of Padova, “Natural and
synthetic polysaccharide-based systems to develop novel
nanomedicine”

15.00-15.30 Coffee Break and Poster session

Novel nanodelivery systems

Chairs Giuseppe Gigli and Pierangelo Metrangolo

15.30 Francesca Baldelli Bombelli, Politecnico di Milano, “Functional
hybrid Au-protein supraparticles for nanodelivery”

15.45 Roberto Simonutti, University of Milano-Bicocca, “Novel
polymeric nanostructures obtained by self assembly for drug delivery”

16.00 Francesco Cellesi, Politecnico di Milano, “Synthetic polymers of
controlled molecular architecture for targeted drug delivery and
diagnostics”

16.15 Loretta Del Mercato, Istituto Nanotec CNR, Lecce,
“Multifunctional stimuli-responsive systems for sensing and therapy:
towards precision medicine”

16.30 Cristiana Di Valentin, University of Milano-Bicocca, “Modelling
Stimuli-Responsive Nanomaterials for Biomedical Applications”

16.45 Fabrizio Mancin, Università di Padova, “Self-organized
multifunctional ORMOSIL nanoparticles”

17.00 Keynote, Paolo Netti, University of Napoli Federico II & IIT, “Cell
instructive materials to control and guide cell function and state”

17.30-19.00 Poster session

Friday 3 May 2019

Novel biomaterials and Bio-nano interface

Chairs Livia Visai and Luigi Ambrosio

9.00 Keynote. Lorenzo Moroni, Maastricht University, “Biofabrication:
from rapid prototyping to bioprinting”

9.30 Laura Russo, Department of Biotechnology and Biosciences,
University of Milano-Bicocca “Biomaterials functionalization for
nanomedicine applications”

9.45 Maria Grazia Raucci, CNR Napoli, “2D substrate based on
exfoliated black phosphorus with dual therapeutic/regenerative
behaviors”.

10.00 Nora Bloise, University of Pavia, “Shaping cell behavior by
changing the topography and chemistry of the substrate”

10.15 Stefano Salmaso, University of Padova, “Programming drug
nanocarrier interfacing properties for enhanced selective targeting”.

10.30 Paolo Bigini, IRCCS - Istituto di Ricerche Farmacologiche “Mario
Negri”, Milano, “Bio-nano interaction, from the whole body to
sub-cellular bodies”

10.45-11.15 Coffee break and poster session

Nanotoxicity and technical tools for nano-bio characterization

Chairs Giberto Chirico

11.15 Paride Mantecca, University of Milano-Bicocca,
“Nano-bio-interactions studies in the safety evaluation of antibacterial
metal oxides NPs”

11.30 Roberto Rusconi, Humanitas, “Microfluidic experiments of
pathogens transport and biofilm formation”

11.45 Giulio Sancini, University of Milano-Bicocca. “The Janus faces of
the inhaled nanoparticles”

12.00 Maddalena Collini, University of Milano-Bicocca, “Photothermal
nanoparticles: smart applications and detection”

12.15 Fabio Corsi, Department of Biomedical and Clinical Sciences L.
Sacco, University of Milan and Istituti Clinici Scientifici Maugeri IRCCS
Pavia. “Biophotonics and nanoparticles: how they can help clinicians in
breast cancer management?”

12.30 Francesco Mantegazza, University of Milano-Bicocca, “AFM
Single-Molecule Force Spectroscopy of α -Synuclein”
